CHICAGO, April 27.—The stupendous work of building a model city to accommodate 100,000 people was begun yesterday when 100 woodcutters were set at work clearing a 6,000-acre tract on the shore of Lake Michigan in Lake County, Ind. The newly organized Indiana Steel Company, which is backing the venture, will build the largest steel mill in the world at a cost of \$10,000,000. The new city will be called Gary, after the steel magnate of that name.

## GETS SCHOOL SITE THROUGH A TRADE.

Pennsylvania Company Needed Lot, but Original Deed Forfeited the City to Sell It.

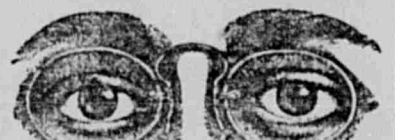

The Pennsylvania Railroad has in the past two years bought 8,000 city lots in the Sunnyside section of Long Island City for a freight terminal. Sunnyside has been wiped out, but the improvement struck a snag in Public School No. 2. The site was given to the city 150 years ago by the Brogaw family for school purposes only, and the deed provided that the property should never be sold. Yesterday the agents of the company offered to the local School Board seven lots in another part of the city in exchange and to grade and improve the lots and to move the schoolhouse there. The local board accepted, and the matter will come up before the full board for ratification to-morrow.
